L11 ANSWER 1 OF 1 CA COPYRIGHT 2005 ACS on STN
AB Soybeans are soaked in water, mashed, and heated at pH 1.0-12.0, and
subsequently, ~~sterilized at a high temperature at pH 1-2, or at pH 11.5-12.0 to~~
give an extract containing trypsin inhibitors. The pH is adjusted to 1-2 by
inorg. and organic acids, and to 11.5-12.0 by hydroxides. The extract is used
for controlling diaper rash and other skin disorders.
